Serial Number Sector of Mine Equipment Division War Production Board

40

Gentlemen,

1.

-

300103E

Serial Number Sector of Mine Equipment Division War Production Board

)

Gentlemen:

7

ŧ

秃

The undersigned operators Brown and Root Inc. whose home office is located in Houston Texas and whose temporary office in Joplin, Mo. is located at 223 West Third Street are applying for a temporary preference rating order No.P-56.

The Webb City Mining Area is located in Jasper County Mo. this is an old mining area under which mining operations were carried on from 1909-1919. Entire area under water at present time. The undersigned have made application to War Production Board for permission to dewater this area and open up the various old mines. There are in excess of 165 shafts in this area and 38 miles of mining face exposed. This area produced in the past some 53,000,000 rock tons of ore which yielded 1,870,000 tons of zinc sulfide and 221,000 tons of lead sulfide.

Brown and Root Inc. have been appointed agents of the Metals Reserve Company to carry on certain exploratory churn drilling in this area. The plan being to check old drill holes and verify the estimate of reserves set up by our engineers so that the War Production Board may come to a speedy decision as to the authorization to future development in this area. In connection with this exploratory work it will be necessary for Brown and Root Inc. to purchase a certain amount of material and supplies to be used in connection with this work. This is our reason for asking for a temporary preference rating order P-56.

It is the operators belief that the ores mined in this area will recover an average of 2.8% or better in lead and zinc concentrates.

Will appreciate it if you send any correspondence to 223 West Third Street, Joplin, Mo.

Respectfully submitted, Brown and Root Inc.

by D.M. Cashin, Agent
